

I have a disability and I was so happy when the "DO NOT CALL" law became available. If those companies want to sell their products tell them to use the internet or regular mail. To call at all hours of the day and night is just ridiculous and for me it is painful to go to the telephone only to find it was a telemarketer. Please do not allow telemarketers to have access to our phone numbers if we choose not to be listed. Thank you.
